Chemical determinations: expanded uncertainty is referred to 95% confidence level. Coverage factor k=2.
 The limit of determination (LOD) results as $1/10LOQ*3$
 N.D.= less than LOQ (limit of quantification)

Limits referred to European directive UNI EN 71-3/2013 and UNI EN 14362-1 (2012 edition)

NOTE: Screening of volatiles has not revealed any analyte potentially toxic.

Opinions and Interpretations: (not subject to accreditation Accredia)

Relatively to the parameters analyzed, the sample complies with European Regulation EC 1935/2004.

The reported results only refer to the tested sample.

u.m. = unit of measurement; unc = uncertainty;

Sample conditions at the arrival are recorded in the laboratory managing system.

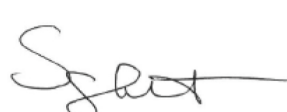

Food and not perishable samples are store for 30 day from the arrival date.

Water, compost and perishable samples are stored until the emission of the Test Report.
